RE: SUBSCRIBER ACKNOWLEDGEMENT REPORT 9/27/05
WC Docket No. 05-196

Dear Ms. Dortch:

The purpose of this correspondence is to notify the Commission that as of the date of this filing, 100% of CordiaIP Corp.'s customer base has affirmatively acknowledged their understanding of the 911 advisory and CordiaIP Corp. will not have to disconnect any of its subscribers.

As stated in previous correspondence to the Commission the only method of enrollment for our VoIP services is through our website. When subscribers sign up for our VoIP service they encounter a screen disclosing, in plain language, our current 911 dialing capability and the circumstances in which E911 service may not be available. If the potential subscriber fails to affirmatively acknowledge their understanding of the 911 advisory they cannot go on to the next screen to continue their order for our service. After signing up for our service via our website, we ship our subscribers a telephone adapter and the required warning label. This current method of enrollment ensures that we obtain an affirmative acknowledgment to the 911 advisory from 100% of our subscriber base. In addition, we send our subscribers follow-up correspondence which includes additional warning stickers for their use and reminds them that they previously acknowledged their understanding of our 911 dialing capability.

CordiaIP may commence telemarketing of its VoIP service by the end of this year. To ensure compliance with the Commission's 911 advisory acknowledgement requirement, our telemarketing script and third party verification script will contain 911 advisory disclosures. The third party verification will require that the subscriber affirmatively acknowledge their understanding of the 911 advisory. If the customer does not acknowledge their understanding on the third party verification recording VoIP services will be denied. After acceptance of an order for CordiaIP VoIP service the customer will receive a welcome package which contains a telephone adapter with warning stickers pre-affixed to the hardware, additional warning stickers for placement in the subscriber's home and follow-up correspondence reiterating their acceptance of the 911 advisory.
